1. Qualitative Information on Quarterly Consolidated Operating Results

(1) Analysis of Operating Results

During the third quarter of the current consolidated fiscal year, Japan's economy showed sluggish growth at the beginning of the period, despite negative growth in personal consumption, the economy recovered afterward and recorded positive growth against a backdrop of growth in exports. On the other hand, overseas, the U.S. economy remained strong, but the Chinese economic recovery decelerated, and the European economy continued to be on a declining trend.

Given these circumstances, net sales of the Tomoe Engineering Group for the consolidated third quarter were 35,823 million yen, 9.4% up from the same period of the previous year, reflecting increases in net sales for both the Machinery & Equipment Business and the Chemical Product Business. With respect to earnings during the period, operating income was 2,888 million yen, 29.5% up from the same period of the previous year, because of increased profits in the Chemical Products Business, while ordinary income came to 2,920 million yen, 24.8% up from the same period of the previous year.
